

IN THE CLAIMS:

Please cancel claim 5, amend claims 1, 3, 4, 6, and 9, and add new claims 10-13, as follows:

1. (Currently Amended) A keyboard comprising a rotatable wheel having an asymmetric outer profile, the rotatable wheel having a diameter and a width, the width being greater than the diameter.

2. (Original) The keyboard of said claim 1, said rotatable wheel configured to provide a scrolling command when rotated.

3. (Currently Amended) A keyboard comprising:
an alphanumeric section; and
a rotatable wheel having a width, first and second sides, and an outer diameter at each said side, said outer diameter being larger at said first side than said second side, said first side being more proximal to the alphanumeric section than said second side.

4. (Currently Amended) A keyboard comprising a rotatable frustum-shaped member, and at least one of a Cut key, a Copy key, and a Paste key located within 3 cm of said rotatable frustum-shaped member.

5. (Canceled).

6. (Currently Amended) ~~The keyboard of claim 4, further comprising~~ A keyboard comprising a rotatable frustum-shaped member and a keyboard upper housing having a planar section and raised ridge, said rotatable frustum-shaped member located in said raised ridge.

7. (Original) The keyboard of claim 6, wherein said rotatable frustum-shaped

member is a scrolling device rotatably movable in opposing directions.

8. (Original) The keyboard of claim 4, further comprising an input element that provides a back command when actuated.

9. (Currently Amended) A keyboard comprising a rotatable frustum-shaped member, and further comprising an input element that provides a back command when actuated~~The keyboard of claim 8~~, wherein the input element is located 2.5 centimeters or less from the rotatable frustum-shaped member.

10. (New) The keyboard of claim 1, wherein the rotatable wheel has a frustum shape.

11. (New) The keyboard of claim 1, wherein the rotatable wheel is rotatable about an axis extending laterally relative to the keyboard.

12. (New) The keyboard of claim 11, further including an alphanumeric section disposed lateral to the rotatable wheel.

13. (New) The keyboard of claim 3, further including:
a Cut key a Copy key, and a Paste key, at least one of which is within 3 cm of the rotatable wheel;
an input element that provides a back command when actuated; and
a keyboard upper housing having a planar section and raised ridge,
wherein the rotatable wheel is spaced laterally from the alphanumeric section, is rotatable about an axis extending laterally relative to the keyboard, and is located in the raised ridge.
